## EXECUTIVE SUMMARY

W26 opens the final week of H1 2026 and marks a structural shift in this scout's workflow: three W25 High Priority companies now have completed W2 Qualification Memos and are overdue for active outreach (Gigaton 88/100, Capsa AI 82/100, Jedify 78/100). The sourcing pipeline is ahead of the conversion pipeline – this week, MAKR must move from analysis to action.

· **Enterprise AI transformation**: Conduct + Limitless Labs + Airspeed all address the "enterprise AI deployment gap" – the chasm between AI capability and enterprise production deployment.

· **Industrial convergence**: Heidelberg Materials, Fraport, DHL, Daimler Truck all appearing as customers across multiple portfolio candidates.

· **W2 Action bottleneck**: R2-D9 has qualified the top W25 companies. The bottleneck is now relationship initiation, not sourcing. Three intro requests should go out this week.

Recommended immediate actions:

1. **Gigaton** – Urgency CRITICAL. Series A closed June 3 (3 weeks ago). Intro via Plural now or window closes.
2. **Capsa AI** – Urgency HIGH. Direct outreach to Danyal Ozduzenciler. Investor+customer angle. Request deck + verified ARR.
3. **Upriver** – Urgency HIGH. Seed window is the fastest-closing. Intro via Hetz Ventures within 1 week.
4. **Conduct** – New W26 entry. Intro via Index Ventures or Creandum. Heidelberg/Fraport shared customer base = powerful warm angle.

## Gigaton

UK (London) | Series A | \$26M | June 3, 2026

AI INFRASTRUCTURE + ENERGY/CLEANTECH + CONSTRUCTION – W25 CARRY-FORWARD

AI control OS for energy-intensive heavy manufacturing (cement, steel, glass, chemicals). Replaces legacy control infrastructure using deep RL and digital twin simulation. Customers: Holcim, Heidelberg Materials. W2 Qualification Score: 88/100 – highest of any W25 company. Full memo: `memories/scout/w25-w2-qualification.md`.

**MAKR ANGLE** Triple thesis (AI + cleantech + industrial). Best-scored company in MAKR pipeline. Plural, 2150, Planet A, Semapa Next syndicate is the strongest in European climate-AI. Status: W2 complete. Action overdue. Series A closed June 3 – now 3 weeks ago.

**ACTION CRITICAL.** Request intro to Josh Vernon (CEO) via Plural lead partner this week. Every additional week of delay narrows the post-raise relationship window.

## Capsa AI

UK (London) | Series A | \$18M | June 10, 2026

AI INFRASTRUCTURE / SAAS + FINTECH (B2B) – W25 CARRY-FORWARD

AI OS for private equity and private capital firms. 100% customer renewal, 122% NRR, 14x YoY ARR growth. W2 Qualification Score: 82/100. Full memo: `memories/scout/w25-w2-qualification.md`.

**MAKR ANGLE** MAKR is both potential investor AND customer. Best SaaS metrics in active pipeline. No tier-1 VC – brand arbitrage opportunity. Status: W2 complete. Deck request pending.

**ACTION HIGH.** Direct outreach to Danyal Ozduzenciler (CEO). Angle: MAKR as investor-customer.

## Jedify

Israel | Series A | \$24M | June 10, 2026

AI INFRASTRUCTURE / SAAS – ENTERPRISE CONTEXT GRAPHS – W25 CARRY-FORWARD

Autonomous context graphs for enterprise AI agents. Patent-pending Semantic Fusion. Norwest (lead), Snowflake Ventures, S Capital. W2 Qualification Score: 78/100. Full memo: `memories/scout/w25-w2-qualification.md`.

**MAKR ANGLE** Core AI infrastructure at Series A. Snowflake strategic validates approach. European municipal/govt expansion natural vertical. Status: W2 complete. Intro via Norwest not yet initiated.

**ACTION HIGH.** Intro via Norwest or Snowflake Ventures network this week. Window narrowing.

# Upriver

Israel | Seed | \$14M | June 11, 2026

AI INFRASTRUCTURE / SAAS – ENTERPRISE DATA ENGINEERING – W25 CARRY-FORWARD

AI-native platform autonomously managing enterprise data pipelines. Customers: Unity, DMGT. Databricks + Snowflake partnerships. Talpiot founders. W2 Qualification Score: 76/100.

ACTION URGENT. Intro to Ido Bronstein via Hetz Ventures within 1 week. Fastest-closing window in the pipeline.

## WATCHLIST (6)

· | Company | Country | Stage | Amount | Why Watching |

· |-----|-----|-----|-----|-----|

· | Semble | UK | Series C | £30M | AI orchestration for private healthcare. 1,700+ providers, 10M patients, 1,200 integrations. Revaia + Partech + Octopus. Above MAKR stage but health infrastructure model is relevant. |

· | NVision | Israel / Germany | Series B | \$55M | Quantum-enhanced MRI for cancer imaging. Abbott-led. EIB loan. Israeli-founded, German HQ (Ulm). Total \$120M raised. Monitor for spinout/adjacent plays at earlier stage. |

· | Unframe | Israel | Series B | \$50M | Enterprise AI production platform. 400% NRR. Highland Europe + Bessemer + Craft. Stage above MAKR (Series B, \$100M total) but NRR story instructive for thesis. |

· | Kimba | Israel | Seed | \$6.5M | AI scent therapy for sleep. University of Haifa research validated. Selva Ventures. Consumer health device – limited MAKR infrastructure fit but novel health AI signal. |

· | Kela | Israel | Growth | \$200M | Defense OS for military systems. Bill Ackman + Eric Schmidt + Sequoia. Way outside MAKR thesis but signals Israeli dual-use AI capital concentration. |

· | Wonderful | Israel / NL | Series B | \$150M | Enterprise AI agents for customer service (voice, chat, email). Insight Partners + Index. Founded Mar 2025. 350 employees. Europe + MENA expansion. Monitor – above stage but category is core MAKR thesis. |
